

## TRS500E RECOVERY UNIT

**POWERFUL RECOVERY,  
PRECISION ENGINEERED**

**PRO-SET® IGNITION PROOF  
REFRIGERANT RECOVERY MACHINE FOR  
CLASS A1, A2, A2L, A3 REFRIGERANTS**

The TRS500E recovery unit is expertly engineered to deliver high-performance results, all while meeting stringent ANSI 12.12.01 injection-proof standards.

Equipped with a BLDC motor and an innovative wobble piston design, it provides smooth, efficient operation with no 50 Hz degradation, ensuring consistent performance across frequencies.

Weighing just 21 lbs, the TRS500E offers purge possibility. With dual voltage capabilities (110-240V), sealed crank and start relay designs, and its robust one-piston compressor, the TRS500E is built for versatility, durability, and safety in any recovery situation.
